DOCUMENTATION OF LAND USE PLAN CONFORMANCE AND NEPA ADEQUACY

NUMBER: DOI-BLM-CO-N010-2010-0079

PROJECT NAME: August 2010 Oil & Gas Leasing, Little Snake Field Office

LEGAL DESCRIPTION: See Attachment A

A. Describe the Proposed Action

The proposal would be to lease, for potential oil and gas exploration and production, approximately 11,875.53 acres of Federal mineral estate within the Little Snake Field Office Area. The US Bureau of Land Management (BLM) and private landowners manage the surface estate. The mineral estate is administered by the BLM. Ten parcels of 11,875.53 acres are nominated to be leased (See Attachment A). Two parcels, totaling 767.4 acres are in Moffat County and eight parcels, totaling 11,108.13 acres are in Routt County. The legal descriptions and applicable land use stipulations are identified in Attachment A. The parcels identified in Attachment B are proposed to be deferred in the upcoming August 2010 competitive lease sale.

As part of the Little Snake Field Office (LSFO) review, parcels are reviewed to make sure the appropriate stipulations will be attached at the time of the lease sale. All of the parcels or portions of the parcels that have been recommended to be deferred from leasing at this time or have added stipulations are listed in Attachment B. All of the parcels listed in Attachment C are recommended for leasing and have the correct stipulations identified in Attachment C. Portions of parcels 5706 and 5707 are recommended for leasing. All of parcels 5711, 5695, 5698, 5701, 5704, 5709, 5665, and 5666, and portions of parcels 5706 and 5707 have been recommended to be deferred from leasing until the Little Snake Proposed Plan/FEIS ROD has been signed. High and medium priority sagebrush habitats, developed by CDOW, represent important sagebrush habitat in northwest Colorado. In the Little Snake Proposed Plan/FEIS, LSFO is proposing to place a 1% disturbance limitation for oil and gas development on new leases in high priority areas and a mandatory 5% disturbance limitation on leases in medium priority areas. This proposed approach was shared at public meetings, including the northwest Colorado energy summit in May 2008. The BLM now runs the risk of oil and gas operators leasing in these areas to avoid this impending stipulation. In order to protect these high and medium priority habitats, LSFO recommends these parcels are deferred until the completion of the planning process. Leasing these parcels at this time would foreclose the opportunity to apply stipulations based on the new information.

B. Land Use Plan (LUP) Conformance

LUP Name: Little Snake Resource Management Plan and Record of Decision (ROD)

Date Approved: April 26, 1989

- Draft RMP/EIS February 1986
- Final RMP/EIS September 1986
- Colorado Oil and Gas Leasing and Development Final EIS January 1991

C. Identify applicable NEPA documents and other related documents that cover the proposed action.

Colorado Public Land Health Standards, Decision Record & Finding of No Significant Impact and Environmental Assessment, March 1997.

D. NEPA Adequacy Criteria

1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed? Is the current proposed action located at a site specifically analyzed in an existing document?

Yes, the proposed lease parcels are within the area analyzed by the RMP and this action is the same as proposed there in. That action was to make Federal oil and gas resources available for leasing with standard stipulations or, where necessary add special stipulations including no surface occupancy, avoidance, or timing restrictions.

According to the Tenth Circuit Court of Appeals, site-specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site-specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that, BLM is not required to undertake a site-specific environmental review before issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land. (Colorado Environmental Coalition Et AL., IBLA 96-243, decided June 10, 1999).

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the current proposed action, given current environmental concerns, interests, and resource values?

Yes, the alternatives analyzed in the RMP included Continuation of Present Management, Standard Terms and Conditions, and the Proposed Action. They provided a broad range of alternatives, which in our judgment adequately address current environmental concerns, interests, and resource values.

3. Is the existing analysis valid in light of any new information or circumstances?

Yes, the existing RMP/EIS is valid. We are not aware of any new information or circumstances that would require modification of the analysis. The impacts analyzed in the RMP/EIS are greatly in excess of those that have actually occurred to date.

Since the RMP was approved, on-going scientific research has identified the potential impacts of “greenhouse gases” (GHG) and their effects on global atmospheric conditions. These GHGs include carbon dioxide, CO₂; methane; nitrous oxide; water vapor; and several trace gases. Through complex interactions on a global scale, these GHG emissions are believed by some to cause a net warming effect of the atmosphere primarily by decreasing the amount of heat energy radiated by the Earth back into space.

In 2001, the Intergovernmental Panel on Climate Change (IPCC) predicted that by the year 2100, global average surface temperatures would increase 1.4 to 5.8°C (2.5 to 10.4°F) above 1990 levels. The National Academy of Sciences (2006) supports these predictions, but has acknowledged that there are uncertainties regarding how climate change may affect different regions. In 2007, the IPCC also concluded that “warming of the climate system is unequivocal” and “most of the observed increase in globally average temperatures since the mid-20th century is very likely due to the observed increase in anthropogenic [man-made] greenhouse gas concentrations.” Other theories about the effect of GHG’s on global climate change exist.

The assessment of GHG emissions and climate change remains in its formative phase; therefore, it is not yet possible to know with certainty the net impact to climate from GHGs produced globally over the last century or from those produced today. The lack of scientific tools designed to predict climate change on regional or local scales limits the ability to quantify potential future impacts of climate change on the specific area offered for leasing. In addition, while any leasing and future development may involve some future contribution of GHGs, these contributions would not have a significant effect on a phenomenon occurring at the global scale believed by some to be due to over a century of human activities.

In any case, no emission generating activities can occur without further BLM approval. If the parcels are proposed for development subsequent to lease issuance, operations that may be considered sources of GHG emissions could be made subject to any condition of approval addressing greenhouse gas emissions that BLM may develop through future NEPA analysis at either the plan or development project level designed specifically to reduce GHG emissions. Specific measures developed at the project stage would be incorporated as “Conditions of Approval” in the approved APD and are binding on the operator.

While there is new information concerning the contribution of greenhouse gas emissions to climate change, the information is not significant in relation to the environmental effects of this action. Therefore, no additional NEPA analysis is needed for this action.

4. Do the methodology and analytical approach used in the existing NEPA document(s) continue to be appropriate for the current proposed action?

Yes. The methodology and analytical approach used in the 1991 leasing EIS is appropriate for this proposed action. The use of new methodologies or approaches would result in the same impact conclusion and leasing decisions.

5. Are the direct and indirect impacts of the current proposed action substantially unchanged from those identified in the existing NEPA document(s)? Does the existing NEPA document analyze site-specific impacts related to the current proposed action?

Yes. The direct and indirect impacts of the current proposed action are substantially unchanged from those identified in the 1991 leasing EIS. (See also D.1. above.)

6. Are the cumulative impacts that would result from implementation of the current proposed action substantially unchanged from those analyzed in the existing NEPA document(s)?

Yes, the actual cumulative impacts are well within the parameters addressed in the 1991 Oil & Gas Leasing Plan Amendment on pages 2-27 thru 4-29. To date, the amount of surface disturbance on public land has been less than predicted and added to past present and reasonably foreseeable actions of BLM and others, the impact prediction remains accurate. Implementing the proposed action will not substantially change the cumulative impact analysis.

7. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

Yes. Full public review occurred during the RMP/EIS process. The current proposed lease sale would fall under the RMP/EIS. In addition, a notice of competitive lease sale is posted in all BLM and USFS offices approximately 45 days prior to the sale or on the BLM web site, www.co.blm.gov/oilandgas/leasinfo.htm. It is also available through the mail for a fee to those that request it and make arrangements to pay the fee.

E. Interdisciplinary Analysis: Identify those team members conducting or participating in the preparation of this worksheet.

Remarks:

Cultural Resources: Any lease parcel may contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O.13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.”

Native American Religious Concerns: None known. Further tribal consultation will occur prior to the issuance of any permit.

Wildlife: LSFO contacted Colorado Division of Wildlife to notify them about the lease sale and invite them to a meeting to discuss any concerns they might have. CDOW originally had no comments because BLM intended to defer all the nominated parcels. However, after further discussion, BLM recommended sections of the parcels for leasing. CDOW sent comments on the parcels and pointed out that part of parcel number 5707 lies within an elk production area. BLM confirmed this and added the elk calving stipulation.

Conclusion

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM’s compliance with the requirements of NEPA.

T. 0050N., R 0890W., 6TH PM
Sec. 36: NESW;

The following lands are subject to Exhibit CO-09 to protect big game winter habitat:

T. 0050N., R 0890W., 6TH PM
Sec. 23: NENE,S2NE,E2NW;
Sec. 23: NESW,SE;
Sec. 24: ALL;
Sec. 25: NWNE,NENW,NESE;
Sec. 26: SW,W2SE;
Sec. 36: W2NE,N2SW;

The following lands are subject to Exhibit CO-18 to protect raptor nesting and fledgling habitat:

T. 0050N., R 0890W., 6TH PM
Sec. 36: N2SW;

The following lands are subject to Exhibit CO-25 to protect surface or underground coal mines:

T. 0050N., R 0890W., 6TH PM
Sec. 23: NENE,S2NE,E2NW;
Sec. 23: NESW,SE;
Sec. 24: ALL;
Sec. 25: NWNE,NENW,NESE;
Sec. 26: E2NW,SW,W2SE;
Sec. 36: W2NE,N2SW;

The following lands are subject to Exhibit CO-26 to protect fragile soils:

T. 0050N., R 0890W., 6TH PM
Sec. 23: NESW,SE;
Sec. 23: NENE,S2NE,E2NW;
Sec. 26: S2SW;
Sec. 36: NWNE;

The following lands are subject to Exhibit CO-27 to protect steep slopes:

T. 0050N., R 0890W., 6TH PM
Sec. 36: NWNE;

The following lands are subject to Exhibit CO-28 to protect riparian/wetland vegetation:

T. 0050N., R 0890W., 6TH PM
Sec. 24: NENE;
Sec. 36: SWNE,NESW;

The following lands are subject to Exhibit CO-30 to alert lessee of closure period for nesting grouse species:

T. 0050N., R 0890W., 6TH PM
Sec. 23: NENE,S2NE,E2NW;

Sec. 24: N2NE,SENE,NW,SE;
Sec. 25: NWNE,NESE;

All lands are subject to Exhibit CO-34 to alert lessee of potential habitat for a threatened, endangered, candidate, or other special status plant or animal.

All lands are subject to Exhibit CO-39 to protect cultural resources.
